

# Niranjan Dabhade

*Jr. Software Engineer*

niranjan.dabhade7@gmail.com | +91 7721082727 | India | LinkedIn | GitHub | Portfolio | LeetCode

## Education

Maharashtra Institute of Technology

2021–2025

B.Tech in Computer Science and Engineering (CGPA: **8.6**)

## Work Experience

Findability Sciences Pvt. Ltd.

Jan 2025 – Present

*Chh. Sambhajinagar, Maharashtra*

*Jr. Software Engineer*

Aug 2025 – Present

- **Engineered centralized SSO authentication** across a 4-product enterprise suite (**1000+ users**) using **Java Spring Boot**, **Auth0**, and **PKCE**; integrated a central **Redis** cache to reduce authentication latency by **30–50%**.
- **Developed backend architecture** for a real-time factory digital twin, integrating **BigQuery** and **Pub/Sub** to stream operational KPIs; supported **100+ concurrent users** and reduced query costs by **40%** through optimized indexing and rate limiting (100+ requests/sec).
- **Accelerated CI/CD deployment speeds by 78%** (45 mins to 10 mins) by migrating Kubernetes pipelines to GitOps (**ArgoCD**) and eliminating manual release steps via **Ansible** automation.
- **Optimized build pipelines** by migrating from SVN to GitHub and configuring Jenkins with SHA-based diff checking, reducing average build times by **30–40%**.
- **Deployed Prometheus and Grafana** for centralized logging and alerting across **15+ production servers**, decreasing mean incident detection time by **60%**.

*Software Engineer Intern*

Jan 2025 – Jul 2025

- **Architected a RAG and NLQ orchestration system** for enterprise metadata search; adopted by 3 internal BI teams, reducing executive data retrieval time across 100+ projects by **70%**.
- **Built full-stack BI chatbots** using **Next.js** and **FastAPI**, serving 50 active internal users.
- **Accelerated UI development by 25%** by creating a reusable Next.js template and a shared **Storybook** component library hosted on a private GCP npm registry.

## Projects

**Learnability AI 2.0 | AI-Powered Educational Platform** (*Next.js, Flask, LangChain, Firebase*)

- **Built an AI-driven learning platform** processing large documents via LlamaParse and a LangChain RAG pipeline, successfully scaling to handle **1,000+ concurrent queries**.
- **Boosted user engagement by 25%** by implementing interactive Mermaid-based mind maps and flashcards.
- **Automated content generation** pipelines using **yt-dlp** and **FFmpeg** to extract, parse, and summarize technical video resources.

**InfectiGuard | Hospital Audit Application** (*React Native, Redux, Firebase, Expo*)

- **Developed an offline-first mobile platform** for hospital ICU monitoring, biomedical waste management, and hand hygiene tracking.
- **Engineered reliable data syncing** via Firebase Firestore and built robust reporting modules for automated Excel dashboard exports.

## Skills

**Languages:** Python, Java, TypeScript, JavaScript, C++

**Frameworks:** Spring Boot, Next.js, React.js, React Native, Node.js, FastAPI, Django

**Cloud & DevOps:** AWS (EC2), Azure, GCP (Compute Engine, Pub/Sub, Artifact Registry, BigQuery, Cloud Monitoring & Logging), Docker, Kubernetes, ArgoCD, Ansible, Jenkins, Prometheus, Grafana, HashiCorp Vault, OpenBao, Linux, Bash/Shell Scripting, Git

**Security & Code Quality:** DAST, OWASP ZAP, Trivy, GitLeaks, SonarQube

**Databases & Data Tools:** PostgreSQL, MongoDB, BigQuery, Redis, Milvus, Firebase

**AI Engineering:** RAG (Hybrid Search), LangChain, Prompt Engineering, Agentic Tool Calling, MCP Servers
